1. Mixed performance of the three major indexes: Is a market reversal imminent?
2. The Smart Investment Strategy Plan No. 3 launches tomorrow—are you ready?
3. Crypto market trading strategies.

Good morning, team!

I'm Milton Reese, your old friend. Today, I'm thrilled to announce an important decision and bring you a special benefit: Starting from tomorrow, I'll be inviting Michael, an outstanding representative from the last "Asset Multiplication Plan," to share his short-term trading ideas, methods, strategies, and actionable signals with all of you. Michael was once my student and later became a partner at the business school due to his exceptional performance and remarkable trading skills. He specializes in short-term swing trading, options hedging, and contract trading, maximizing returns through focused trading strategies. In less than a year, he grew an initial \$5 million investment into \$40 million, achieving an astonishing 700% return—a truly rare accomplishment in any market. Michael's proprietary " α & β " trading system balances medium- and long-term trends with high-volatility opportunities. This system not only excels in the stock market but has also proven highly effective in gold, futures, cryptocurrency, and forex markets. His expertise in options arbitrage, hedging strategies for unexpected events, and α & β leverage trading demonstrates exceptional insight and real-world success. If you're interested in short-term trading, Michael's session will be an event you won't want to miss! Tomorrow morning, he'll share his experiences and unique perspectives to help you inject fresh inspiration into your trading accounts. Are you ready to be inspired by this masterclass in investment wisdom?

Here, the high-precision trading signals of Vanguard AI 4.0 seamlessly integrate with Michael's exceptional expertise in short-term trading, opening the door to achieving dreams for everyone. As the timeless proverb reminds us: "We must make good use of our talents, serve one another, and be wise stewards of both knowledge and wealth." On this platform, filled with opportunities for learning and collaboration, let us grow together, support one another, and witness the blossoming of success. In future events, I look forward to seeing more of you shine, seizing your moment, and crafting your own remarkable chapters with wisdom and hard work. This is a rare opportunity—let's give it our all, invest without hesitation, and strive to reach new heights on our investment journey. With unwavering belief and decisive action, I am confident that each of you can write your own success story in this incredible journey toward growth and prosperity!

Peak Wealth Select Portfolio Plan

Purchase Date	Stock Symbol	Purchase Price	Sale Date	Sale Price	Rate of return
10/22/2024	MSTR	\$215.00	11/11/2024	\$309.50	43.95%
10/16/2024	MARA	\$17.20	11/11/2024	\$23.40	36.05%
10/22/2024	DELL	\$120.30	11/11/2024	\$139.40	15.88%
10/16/2024	GOOGL	\$163.40	11/11/2024	\$179.60	9.91%
10/22/2024	NVDA	\$142.10	/	/	Holding
10/27/2024	BTC	\$67,000.00	/	/	Holding
11/05/2024	BTC	\$69,000.00	/	/	Holding
11/06/2024	IBIT	\$42.30	11/11/2024	\$47.60	12.53%
11/13/2024	SNOW	\$126.00	/	/	Holding

As shown in the chart, these are the recent assets operated by our EVW Business School. Supported by Vanguard AI 4.0's trading signals with an impressive accuracy rate of up to 95%, these assets have delivered outstanding results! MSTR achieved a remarkable profit of 43.95%, MARA gained 36.05%, DELL rose by 15.88%, GOOGL increased by 9.91%, IBIT grew by 12.53%, and BTC spot secured an impressive return of over 25%! These stellar achievements further validate the exceptional performance of Vanguard AI 4.0 and the effectiveness of our unique investment strategies. Regarding NVDA and SNOW, both key players in the AI sector, their current prices remain near cost levels. However, their medium- and long-term trends remain robust. Tomorrow's financial reports will be a pivotal event influencing the trajectory of the AI sector. We will closely monitor the outcomes and proactively prepare strategies to capitalize on potential opportunities.

Meanwhile, EVW Business School is preparing to launch an epoch-making investment initiative designed to help investors transform their financial future! To rapidly enhance brand visibility, expand our user base and asset scale, and lay the groundwork for successfully submitting a Bitcoin Spot ETF application to the SEC in April 2025, we are proud to announce the official launch of the "Asset Multiplication Plan." This ambitious, goal-driven program aims to guide all participants toward a 300% total asset growth, helping you reach the pinnacle of wealth! As a member of the "Asset Multiplication Plan," you will gain exclusive access to the Vanguard AI 4.0 quantitative trading system, valued at over \$100 million. Recognized as one of the most advanced trading tools globally, it boasts a remarkable 95% success rate to safeguard your investment journey. Currently undergoing pre-launch internal testing, this groundbreaking system will soon become the core trading support of EVW Business School, empowering you to execute precise and efficient operations across global markets.

EVW Business School

We not only offer powerful trading tools but also help you build an efficient investment portfolio through a teaching model that seamlessly combines theory with practice. Whether you're a novice trader or an experienced investor, the "Asset Multiplication Plan" is designed to deepen your understanding of market dynamics, equip you with proven trading strategies, and ensure steady wealth growth in even the most volatile markets. Important Reminder: Only those who participate in the Vanguard AI 4.0 internal beta and actively complete their learning check-ins will qualify for this exciting opportunity! For more information, please contact my assistant on Telegram!

Before officially launching the "Asset Multiplication Plan," we are making an all-out effort to ensure that the internal testing of Vanguard AI 4.0 is flawless! While the current trading signal accuracy of Vanguard AI 4.0 exceeds 95%, we are not stopping there. Before its market debut, we aim to gather more multidimensional data and validate its outstanding performance through extensive real-world market testing, ensuring it shines in every trading scenario. Tomorrow, we will unveil the all-new Vanguard AI 4.0-powered Smart Investment Strategy Plan No. 3 — specifically designed for explosive short-term opportunities! This is a plan born to maximize profits and represents the pinnacle of short-term trading strategies. Are you ready to ride this wave of powerful profit potential? If you haven't registered yet, now is the time to act! Seats are limited, so send a private message to my assistant immediately to secure your spot. And here's our unwavering promise: all profits are yours, and we shoulder the risks! This is a truly worry-free investment experience and a golden opportunity to catapult your wealth to new heights. Don't wait, don't hesitate—time waits for no one. The train to financial success is about to depart—lock in your exclusive spot now, and let's witness the incredible surge of profits together!

In the fast-paced world of investing, our mission is to revolutionize traditional investment thinking, making profits direct, decisive, and unstoppable! As risks in the three major indexes continue to accumulate and market volatility intensifies, we are ready to face these challenges head-on by conducting comprehensive tests in the options and crypto markets. Through options trading, we aim to precisely capture profit opportunities in high-risk environments while effectively hedging against potential drawdowns. Meanwhile, with Bitcoin's robust performance signaling the onset of a crypto bull market, we will act decisively to seize this wealth explosion opportunity! At EVW Business School, we go beyond providing world-class tools and trading strategies—we guide our members in accurately identifying opportunities, managing risks, and executing efficient, winning profit plans across global markets. This is the era of action! If you're ready, we will prove through results that success is not a choice—it's a necessity! Join us, take on the market, and completely transform your investment landscape!

U.S. stocks closed mixed yesterday, with the Nasdaq snapping its four-day losing streak, the S&P 500 posting a modest rebound, and the Dow Jones extending its weakness. While market sentiment has slightly improved, caution remains prevalent. From a technical perspective, the Nasdaq and S&P 500 have held their key support levels, signaling a slight stabilization in the short-term trend. However, the Dow Jones fell below its 7-day moving average (MA7), indicating increased pressure for further correction. In terms of sector performance, the technology sector led the gains, with Tesla surging 5.6%. The chip sector also posted broad-based gains, buoyed by AI-related optimism, pushing the Philadelphia Semiconductor Index up 1.14%. The energy sector stood out, driven by a 3% surge in oil prices, while gold rebounded to \$2,615, breaking a six-day losing streak. Cryptocurrency-related stocks were another highlight, with MicroStrategy soaring 12.96%. After the U.S. stock market closed, Bitcoin nearly reached \$92,000 again, further fueling market interest in crypto assets. As the Bible wisely states: "The heart of the wise is in the house of knowledge, but the mouth of fools proclaims foolishness." In the current market environment, it is crucial to respond calmly and remain vigilant in identifying opportunities.

This week, the market is focusing on Nvidia's earnings report and the performance of the Blackwell chip, which will have a profound impact on the overall trend of technology stocks and the AI sector. The market expects Nvidia's third-quarter revenue to grow by 84% year-on-year to \$33.28 billion, with net profit rising by 88.9%. However, the Blackwell chip has faced multiple delays due to "overheating" issues, raising concerns among key customers such as Google and Microsoft. Additionally, the Federal Reserve's interest rate policy and Trump's post-election market strategies remain key points of focus. If Nvidia's results fall short of the high expectations, it could trigger significant market volatility, and those with heavy positions should prepare hedging strategies in advance. As Charlie Munger wisely stated, "Rationality and patience are the two most important qualities in investing." In the face of increasing market uncertainty, only through careful deliberation and maintaining a strategic vision can we remain resilient in the ever-changing market.

Despite this, Nvidia's influence on the U.S. stock market is undeniable. Over the past year, it has contributed up to 20% of the S&P 500's return, and nearly 25% to EPS growth in the third quarter. Bank of America Merrill Lynch has also pointed out that Nvidia's earnings report this week could have a greater impact on the market's short-term direction than non-farm payrolls, CPI, or the

EVW Business School

Federal Reserve's interest rate decision, and may even determine the next market trend. In the context of fading optimism after the election and the increasing fragility of individual stocks, the significance of this earnings report has transcended that of the economic events themselves. At this pivotal moment, with bulls and bears locked in a fierce battle, we must closely monitor Nvidia's earnings report—not only to assess whether it meets high expectations, but also to stay alert to any potential negative surprises. Regardless of the outcome, the "Nvidia moment" is set to be a decisive battle that will shape the future direction of the U.S. stock market.

Evercore ISI maintains its "Outperform" rating on Snowflake (SNOW) with a target price of \$170, believing that its product growth will reach a turning point in 2025, particularly as artificial intelligence (AI) technology is expected to accelerate data consumption. According to a survey, 60% of partners are optimistic about future business and expect significant growth in consumer revenue over the next 12 months, driven by Snowflake's GenAI and Iceberg programs. The company's product revenue for the second quarter grew 30% year-over-year to \$829 million, and it raised its full-year revenue guidance. Additionally, Snowflake completed the issuance of \$2.3 billion in convertible debt, providing strong financial support for long-term growth. Technically, SNOW's stock price remains firmly above the MA62 bull-bear dividing line, with the MA25 crossing above the MA62 (a golden cross), MACD above the zero axis, and the momentum column continuing to grow. Trading volume is healthy, indicating that bullish forces are in control of the market. The current stock price is in the cost range, with limited downside, and it is recommended to continue holding patiently while waiting for a breakthrough in key resistance levels. A strong rally in the market is worth anticipating.

VANGUARD AI 4.0

Crypto market:

Currently, Bitcoin is still experiencing fluctuating movements, but the contract traders who were advised to place long orders near \$90,000 yesterday have already earned significant profits. The price difference reached as high as \$3,000 in a short period, resulting in substantial gains! In such a volatile market, timing and rhythm are key to success! For those who did not strictly follow the strategy, do you regret missing this opportunity now? The market fluctuations in the future will only become more exciting. We will continue to seize every window of profit potential with precise positioning and decisive execution! For those who need trading signals, feel free to send a private message to my assistant.

Bitcoin currently exhibits a strong bullish trend on the daily chart, with prices firmly above the MA7, MA12, and MA25 moving averages, clearly showing a bullish alignment. MA62 continues to rise, consolidating the medium- and long-term upward pattern. Recent positive news in the crypto market has provided substantial upward momentum for Bitcoin. At present, Bitcoin is showing a strong trend of hitting new highs with increased volume, with buying pressure continuing to grow and market sentiment significantly improving, suggesting the bullish trend may continue. From the four-hour chart, Bitcoin is gradually approaching previous highs, and the golden moving average system still shows strong bullish momentum. A breakout may be imminent, depending on whether volume can continue to expand.

The trading strategy remains the same as yesterday, focusing on buying on pullbacks. For contract trading, light long positions can be initiated near \$91,000, with a stop-loss set if the price falls below MA25. For BTC spot trading, with current profits nearing 30%, it is recommended to hold positions steadily. Position sizes should be managed carefully, and stop-loss orders should be set to mitigate short-term volatility risks, while staying focused on medium- and long-term trend opportunities. For detailed real-time trading advice, please message the assistant for guidance as soon as possible.

Sharing topics:

1. Accurately determining buying and selling points using the MA62 moving average.
2. Analysis of strategies for the crypto market.

Good afternoon, team!

I'm Milton Reese, your old friend. How are you feeling right now? Trading is an exciting activity that can bring significant emotional fluctuations. When you succeed in a trade, it feels like dopamine in the brain is triggered, bringing a sense of pleasure and excitement. This thrill is something many traders chase, as it makes them feel energized and accomplished. However, the flip side of trading is the fear and uncertainty it brings. When the market doesn't move as expected or potential losses become evident, fear can emerge. This fear can lead to tension and anxiety, affecting trading decisions and even influencing daily life. To cope with these emotional fluctuations, many experienced traders have developed strong risk management strategies and improve their trading skills through continuous learning and practice. Additionally, mastering emotional management and staying calm under pressure is essential for long-term success in the market. By applying these methods, traders can reduce the negative effects of fear and optimize their trading performance.

If you are still struggling with these emotions, I strongly recommend you join the upcoming "Asset Multiplication Plan." It's not only an opportunity for wealth growth but also a chance for a qualitative change in your mindset and skills! With Vanguard AI 4.0, valued at over \$100 million, this system revolutionizes traditional trading methods with an astonishing 95% signal accuracy, helping you perfectly align with the market rhythm.

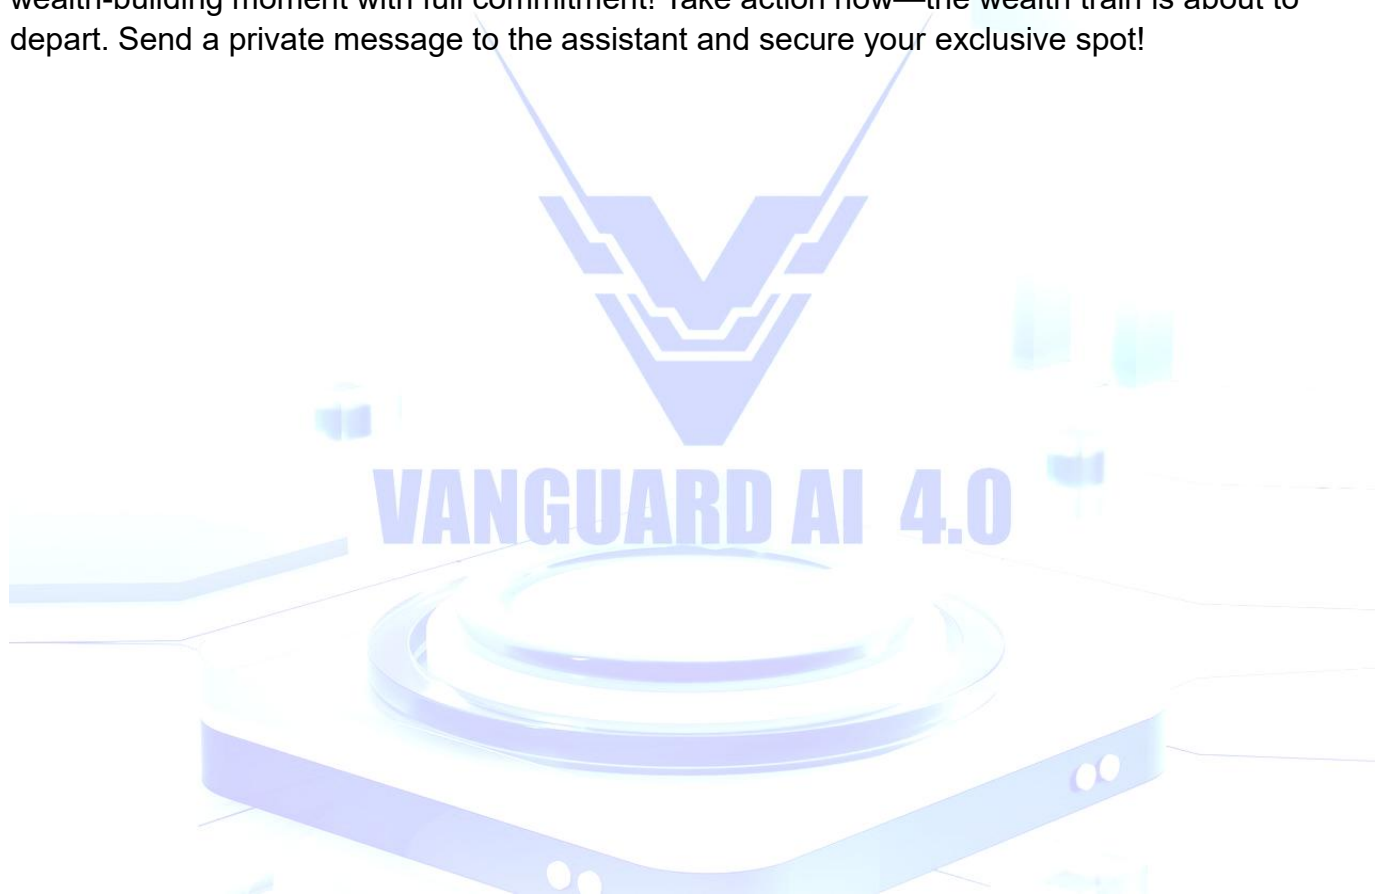

Each of us has one or more dreams in our hearts, which are the visions and goals given to us by God. However, realizing dreams is not just about praying and waiting; it also requires taking action. Faith without action is dead. Faith and action are inseparable. We must take the first step bravely with faith and rely on God's power in every small effort. So, friends, each of us has a unique dream and mission given by God. Let us act with faith and courage. No matter what challenges and difficulties we face, remember that God is with us, and He will help us realize our dreams.

As a fully compliant financial education institution certified by the SEC and FinCEN, EVW Business School has always adhered to the core principles of "putting students' interests first" and "practical experience is the best teaching method." We are dedicated to providing professional, practical educational support to newcomers to the investment field as well as to those passionate about investing. With years of rich experience, EVW Business School has successfully developed many outstanding investors, helping them achieve financial freedom and pursue their life goals. Our mission is to establish EVW Business School as a benchmark in the field of financial investor education, empowering more investors through high-quality education and thoughtful services. Our goal is to make investing simple, efficient, and enjoyable.

EVW Business School

Tomorrow, we will officially launch the highly anticipated Smart Investment Strategy Plan No. 3! This strategy combines short-term explosive potential with medium- and long-term growth prospects, tailored for investors seeking high returns. What's even more exciting is that my partner, Michael, will personally guide you. He is a top expert in short-term swing trading, option hedging, and contract trading. With his concentrated trading strategies, he has consistently achieved remarkable returns, increasing his principal from \$5 million to \$40 million in less than a year! This is a wealth opportunity you cannot afford to miss! Michael will help you tap into the market's pulse, identifying the best trading opportunities with precise strategies, while utilizing the powerful Vanguard AI 4.0 quantitative trading system to revolutionize traditional investment concepts. Tomorrow's plan is not just an opportunity; it's a journey of learning and growth. The rules remain unchanged—100% of the profits belong to you, and any losses will be fully covered by the business school! Here, the risk is not yours to bear. All you need to do is seize the wealth-building moment with full commitment! Take action now—the wealth train is about to depart. Send a private message to the assistant and secure your exclusive spot!

Recently, the three major indexes have been oscillating at high levels, and the market has entered a critical stage of the long-short battle, making the difficulty of individual stock trading noticeably higher. Today, the three indexes showed mixed movements, with some rising and others falling, but all rebounded after touching the MA25 moving average, indicating that short-term technical support is still intact. However, market sentiment remains relatively cautious, and future movements will depend on the guidance of upcoming key events.

Tomorrow, NVIDIA is set to announce its highly anticipated earnings report. This not only has a decisive impact on the overall performance of the tech sector and the AI space but could also serve as a key indicator to guide the market's short-term direction. Currently, NVIDIA's stock has regained a critical technical support level at MA25, and is showing a steady upward trend along this moving average, suggesting that the market maintains high confidence in its earnings outlook. If the earnings report exceeds expectations, it could drive the stock price higher and boost sentiment in the tech sector; conversely, a disappointing report could signal a potential technical pullback. Overall, NVIDIA's technical pattern has completed a key breakout and established solid support. The current trend shows that market sentiment is gradually turning more positive, and technical indicators suggest further upside potential. The market seems to be building momentum, awaiting the earnings report to act as a catalyst.

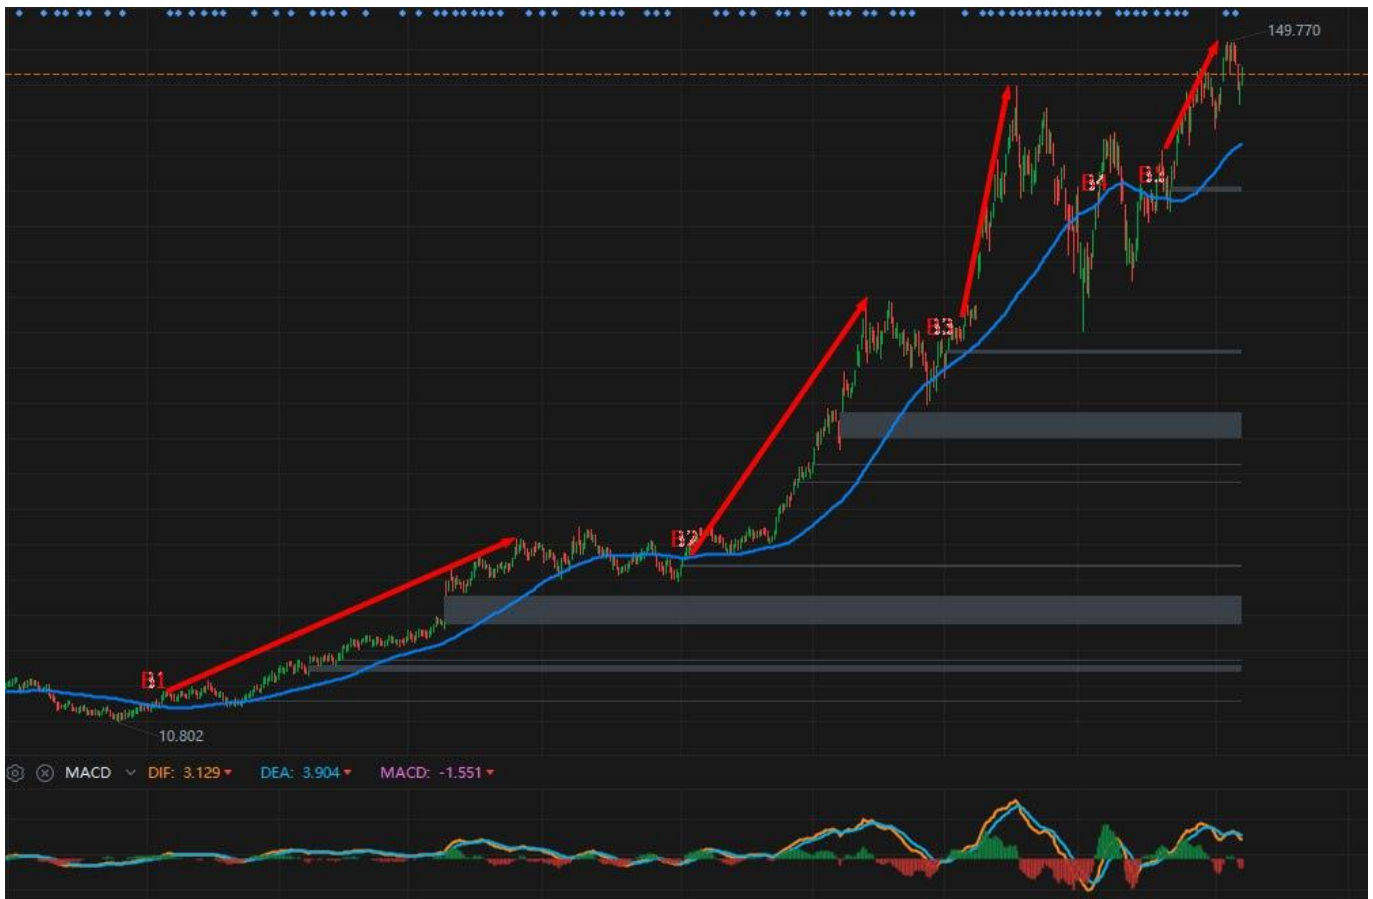

Last week, we explored the operation of the Golden Moving Average System in depth. Today, I will focus on the most important moving average in the system—the MA62 moving average, which I call the bull-bear dividing line.

Why is MA62 so important? Because it not only helps us identify the medium-term trend of the market but also plays a crucial role in key buying and selling decisions. By observing whether the price is above or below MA62, we can quickly determine whether the market is in a bull or bear

phase. Personally, MA62 is the core foundation of my buying and selling strategies. It serves as a tool for filtering out noise and capturing trends. However, before using the MA62 moving average in trading, there is one key step: selecting the right assets. We must filter out high-quality candidates that meet a set of clear and strict selection criteria. Only then can we fully leverage the power of MA62. Today, I will delve into how to combine MA62 with stock selection strategies, turning this bull-bear dividing line into a reliable "compass" for your investment decisions. Are you ready?

As shown in the above chart, these are the two core targets that we focus on: MSTR and NVDA. The reason for choosing to focus on them is very clear: one represents the encryption market, and the other represents artificial intelligence. These two sectors are the super themes that we have always focused on, and MSTR and NVDA are the well-deserved leaders in these two fields.

The reason we can accurately trade these two stocks is that we consistently base our buy and sell decisions around the bull-bear dividing line, MA62. The key strategy is to watch for the stock price breaking through MA62, and then capitalize on the market movement with the support of news-driven catalysts. Below is the specific operational logic for these two targets.

1.MSTR:

B2 Buy Point: Occurs just before Bitcoin enters its fourth halving cycle, with the BTC market sentiment rising sharply, driving MSTR's stock price to break above MA62 and start a new uptrend.

B5 Buy Point: Trump's election triggers market expectations of relaxed BTC regulation, sparking explosive sentiment in the cryptocurrency market. As BTC breaks its previous high, MSTR's stock price is further propelled upward.

2.NVDA:

B2 Buy Point: The explosive impact of SORA (Generative AI) brings new capital attention to the AI sector, with NVDA benefiting directly as a leader in AI chip technology.

B3 Buy Point: NVIDIA releases better-than-expected earnings, fueling extremely optimistic market sentiment and driving its stock price well above MA62, creating a sustained uptrend.

Through the above examples, it is clear that buying and selling around the MA62 moving average is an efficient and reliable strategy. MA62 not only defines the dividing line between bull and bear markets but also provides a precise basis for entry and exit points. By following this approach, you can effectively avoid market risks while maximizing the potential of the main uptrend in your target. Whether it's MSTR in the crypto market or NVDA in the field of artificial intelligence, both stocks have risen due to the strong trends triggered by a breakout above MA62. The facts have proven that by strictly adhering to this strategy, the likelihood of losses is significantly reduced, while the chances of capturing the core market movement are greatly increased. Isn't it simple, efficient, and highly accurate to buy and sell based on the MA62 moving average? Have you mastered it? Now, try to identify the leader in the sector you are optimistic about and analyze whether it follows the patterns I've discussed!

Crypto Market:

Bitcoin is showing a strong bullish trend on the daily chart, with prices steadily trading above the MA7, MA12, and MA25 moving averages. The moving averages are in a bullish arrangement, and the MA62 continues to turn upward, further reinforcing the medium- and long-term uptrend. Recent positive news in the crypto market has injected strong confidence, fueling market momentum. Currently, Bitcoin is showing a trend of breaking through previous highs with increased volume, indicating that buying power continues to grow. The bullish market sentiment is strengthening, laying a solid foundation for continued price movement.

The trading strategy will remain consistent with this morning's approach, with a focus on buying low as the core strategy. Traders with active accounts should seize the current opportunities in the crypto market. Since BTC prices may experience significant fluctuations, please contact the assistant for real-time operational strategies.

Today's Questions:

1. Why did MSTR hit a new high? (10 points)

2. Try to identify the leader in the sector you're optimistic about, and analyze the buying point of its main upward trend using the MA62 moving average. (10 points)

If you encounter difficulties while completing these questions, feel free to discuss and exchange ideas with friends in the group. I believe that brainstorming together will help you gain more insights. That's all for today's sharing. Tomorrow, we will launch Smart Investment Strategy Plan No. 3, so please stay on top of the operation strategy. See you tomorrow!
