Topics:

1. Asset Multiplication Plan—Millionaire Training Camp is about to be officially launched, are you ready?
2. Crypto market trading strategies.

Good afternoon, team! This is Milton Reese, your old friend. Wishing you all a fantastic weekend! As we step into the final month of 2024, it's a perfect time to reflect, plan ahead, and set the stage for the future. On this quiet non-trading day, I'm thrilled to share some exciting news with you: This week, we will begin a comprehensive advanced trading test. This marks not only a deep evaluation of Vanguard AI 4.0 but also the official launch of the Asset Multiplication Plan—Millionaire Training Camp.

In this world full of challenges and opportunities, each of us is seeking a path to success. However, true success is not only measured by personal achievements but by how we help others realize their dreams. As the Bible says, 'Whatever you did for one of the least of these brothers and sisters of mine, you did for me.' Love is the driving force behind our actions. Whether in the family, community, or workplace, when we treat others with love and assist them in achieving their goals, we are not just giving—we are helping to shape a better world.

As a fully compliant financial education institution certified by the SEC and FinCEN, EVW Business School is committed to the core principles of 'putting students' interests first' and 'practical experience being the best form of teaching.' We are dedicated to providing professional and practical educational support to both newcomers to the investment world and those passionate about investing. With years of accumulated experience, EVW Business School has continually nurtured many successful investors, helping them achieve financial freedom and pursue their dreams. Our goal is to establish EVW Business School as a benchmark in the field of financial investor education, empowering more investors with high-quality education and personalized services. We aim to make investing simple, efficient, and enjoyable.

Peak Wealth Select Portfolio Plan

Purchase Date	Stock Symbol	Purchase Price	Sale Date	Sale Price	Rate of return
10/22/2024	MSTR	\$215.00	11/11/2024	\$309.50	43.95%
10/16/2024	MARA	\$17.20	11/11/2024	\$23.40	36.05%
10/22/2024	DELL	\$120.30	11/11/2024	\$139.40	15.88%
10/16/2024	GOOGL	\$163.40	11/11/2024	\$179.60	9.91%
10/22/2024	NVDA	\$142.10	/	/	Holding
10/27/2024	BTC	\$67,000.00	/	/	Holding
11/05/2024	BTC	\$69,000.00	/	/	Holding
11/06/2024	IBIT	\$42.30	11/11/2024	\$47.60	12.53%
11/13/2024	SNOW	\$126.00	11/21/2024	\$173.00	37.30%
11/20/2024	COIN	\$325.00	11/27/2024	\$310.00	-4.62%
11/26/2024	MU	\$104.00	/	/	Holding
11/26/2024	EVW	\$1.40	/	/	Holding

Do you remember the question I left for everyone on Friday? Among all the assets we've recently traded, do you know which ones have seen a maximum increase of over 30% during this period? The answer, as shown in the chart, includes high-performing assets like MSTR, MARA, SNOW, BTC, EVW, and others. It's worth noting that nearly half of the assets have seen gains exceeding 30%. Such impressive results are a direct result of the powerful support provided by the Vanguard AI 4.0 trading system. With an astonishing accuracy rate of over 95% and exceptional stability, this system has shown unparalleled advantages in the dynamic and ever-changing market environment.

These profit and loss figures not only serve as the strongest proof of the Vanguard AI 4.0 trading system, valued at over 100 million US dollars, but also highlight its exceptional performance in real-world applications. What's even more exciting is that Vanguard AI 4.0 is continuously being iterated and upgraded, with its accuracy and efficiency steadily improving, promising even more stable income and substantial returns in the future. Additionally, the upcoming Asset Multiplication Plan—Millionaire Training Camp will be fully supported by Vanguard AI 4.0, providing every participant with scientific, precise, and efficient investment guidance. This is not just an opportunity, but a bridge to financial freedom. Have you already recognized the potential

EVW Business

School

of this system? Are you filled with confidence and eager to achieve a financial leap in this training camp?

Since bottoming out in October 2022, the U.S. stock market has experienced a significant rebound, with optimism gradually returning. However, as the market continues to rise, optimism seems to have peaked, and valuations have reached the fourth highest level in history. This warrants heightened caution from investors. The current market may be at a critical juncture that requires extreme prudence. While I have always been optimistic about U.S. stocks, my view has shifted in light of the tech sector's high valuation and the overall market's overheating. The risk of chasing the rally has increased significantly. We need to strike a delicate balance between pursuing gains and managing risks to avoid overlooking potential correction risks driven by blind optimism.

Chart 6: 4th highest S&P 500 trailing P/E in past 124 years

S&P 500 Trailing P/E

Source: BofA Global Investment Strategy, Bloomberg. Trailing 4Q PE (GAAP until 1960, Pro-forma thereafter).

Especially in the tech sector, valuations are already at relatively high levels, and the pressure for correction is building. While the long-term potential of the artificial intelligence (AI) sector is undeniable, the current high valuations and overheated sentiment suggest that there may be

EVW Business

School

short-term correction risks before a comprehensive breakthrough in AI applications. In this context, investors should consider adjusting their strategies, temporarily avoiding the short-term volatility risks of the tech sector to avoid being caught up in potential market corrections. This cautious approach will help protect capital in uncertain times and prepare for the next wave of opportunities. In contrast, opportunities in the crypto market are gradually emerging. BTC is not only at the beginning of its halving cycle but is also benefiting from the Fed's potential move into a rate-cutting cycle, which provides strong support for the next bull market. Faced with high valuations and possible corrections in traditional markets, it may be a wise decision to adjust investment portfolios and focus more on the potential of the crypto market.

The current market environment is complex and filled with uncertainty, but opportunities often lie hidden within crises. When market sentiment shifts from extreme optimism to caution, it becomes the best time for investors to position themselves prudently. Shifting focus to areas with long-term growth potential, such as cryptocurrencies—especially the bull market for BTC—not only serves as a hedge against high valuation risks but also as a strategic move to capture future growth opportunities. Striking a balance through flexible adjustments, preparing for potential market declines while not overlooking possible upward momentum, is the optimal approach to navigating the current market.

In the investment portfolio of Smart Investment Strategy Plan No. 4, EVW has realized a floating profit of about 30%, showcasing its strong upward momentum. Driven by the ongoing bull market cycle in the cryptocurrency sector, EVW has significant growth potential, a clear demand for catch-up growth, and enormous trend opportunities. In comparison, although MU currently shows a floating loss of about 6%, as part of the portfolio's medium- and long-term strategy, its stock price is approaching a key support level, indicating rebound potential, so it remains worth holding. However, the current investment focus is undoubtedly on EVW, as its strong profitability and future upward trajectory offer greater profit potential for the portfolio. Maintaining a firm hold on EVW and capitalizing on its rapid growth potential is the optimal strategy for asset appreciation at this stage.

Friends, today I'm excited to share some great news—the highly anticipated Asset Multiplication Plan—Millionaire Training Camp, is about to officially launch! Starting tomorrow, we will begin the contract trading test of Vanguard AI 4.0. I am incredibly excited about this test. In the past, we've witnessed the outstanding performance of Vanguard AI 4.0 in various complex market environments, with its remarkable accuracy and stability widely recognized. This time, it will be applied to contract trading for the first time, and I believe it will deliver even more extraordinary results!

What's even more exciting is that the Asset Multiplication Plan—Millionaire Training Camp will fully rely on Vanguard AI 4.0 to provide each participant with scientific, accurate, and efficient investment support, helping them quickly realize wealth growth. To ensure the smooth execution of this event, we have invested a lot of time and effort into preparation. Recently, we've had in-depth discussions with the main sponsor of this event and officially established a partnership. This sponsor is the exchange where our EVW token is listed. With a shared vision and values, we have deepened our collaboration. They have obtained regulatory qualifications from the U.S.

EVW Business

School

Securities and Exchange Commission (SEC), the U.S. Financial Crimes Enforcement Network (FinCEN), and the National Futures Association (NFA)! Not only are they strong, but they also have a deep sense of social responsibility. In the near future, they will launch a \$5 billion special fund plan, providing an excellent platform for the development of our community members.

Of course, I cannot fully introduce them in just a few words. Whatever you do, do it with all your might, for there is neither work, planning, knowledge, nor wisdom in the underworld you are heading to. Let us be filled with confidence as we make the final preparations for the Asset Multiplication Plan—Millionaire Training Camp. Let's embrace every challenge, seize every opportunity, and work together to achieve our shared dream!

The good news is that they have provided us with 1,000 test accounts, each with \$600 in test funds. While I have strong confidence in the pre-selected strategies of the Vanguard AI 4.0 system (with a win rate of over 95% or even 99%), I do have some concerns about the execution of trades by a few of our friends. I encourage everyone to strengthen their focus and fully cooperate during the test.

This is undoubtedly a very important benefit:

1. The test plan will start tomorrow morning, with a profit target of achieving over 60% returns within one week!
2. Any profits earned through this exclusive account can be withdrawn; if there is a loss, you won't be held responsible as the sponsor will bear it.

The number of spots for this test plan is limited, and I will prioritize outstanding members who have the highest points among the early registrants.

If you haven't registered through my assistant yet, please do so quickly to seize this opportunity or future ones. In the investment market, opportunities are always reserved for those who are better prepared. For those who have already secured a spot, please make sure to download the trading software today and participate in the Vanguard AI 4.0 contract trading test starting tomorrow. As long as the test accuracy exceeds 95%, our Asset Multiplication Plan—Millionaire Training Camp practical plan will be successfully implemented.

Test Target:

Due to the cryptocurrency market's highest overall score, Vanguard AI 4.0 has received the best data in this market, making it the clear choice for our preferred test subject. The seamless, continuous 24/7 trend will provide Vanguard AI 4.0 with a more accurate foundation for its strategies.

Testing Duration and Profit Target

The test will last 3-7 days, with a target of achieving at least 60% total asset return!

Quota and Internal Testing Funds

The test is limited to 1,000 participants.

As you've probably noticed from my strategy, my approach tends to be cautious and steady. This test is crucial—if Vanguard AI 4.0, valued at over \$100 million, fails, it would be a huge

EVW Business

School

embarrassment. Institutions are using it effectively, but if retail investors cannot, that's not the outcome we want to see. Therefore, I've opted for a conservative plan.

For those who aren't selected this time, I invite you to observe and learn. Those who have registered will have priority for participation in the next major plan. If you haven't registered yet, you can still do so to secure better opportunities!

Each participant will receive \$600 in test funds, provided by our sponsor. BFXCOIN, our strategic partner, is a top-tier company that has provided strong support and assurance for this test.

Our sponsors have not only obtained regulatory approvals and relevant financial licenses from the U.S. Securities and Exchange Commission (SEC), the U.S. Financial Crimes Enforcement Network (FinCEN), the National Futures Association (NFA), and the UK Foundation, but more importantly, they are planning to list on Nasdaq. This is fantastic news for us. They are also working to establish a premier ICO issuance platform, which presents excellent investment and partnership opportunities. For example, our EVW token was issued through this platform. Furthermore, we share a strong alignment in the AI sector. They plan to launch a \$5 billion special fund focused on AI-related projects, providing a remarkable platform for many of our outstanding members to showcase their talents.

Rights to Use and Allocate Funds

1. After the test is completed, if the test funds experience a loss, there is no need to repay the lost principal; only the remaining funds should be returned.
2. If there is a profit, you only need to return the principal, and the profit portion can be withdrawn to your cryptocurrency wallet or bank account at any time.

My assistants have already notified the selected participants, provided them with accounts and test funds, and guided everyone on how to use them. If you have any questions, please contact her directly. For those who haven't been notified yet, please check with the assistant to confirm whether you have been selected. If you haven't been selected, please be patient and wait for future opportunities. Once the plan starts, I will choose the most stable trading strategies and signals based on the prompts from the Vanguard AI 4.0 system. It is expected that the number of trading signals will not exceed two per day. To ensure that each trading signal is strictly followed, I will have my assistant share the signals with the selected participants via a Telegram channel. It is highly recommended that you follow our strategy and execute the trades promptly. After completing the trade, please send your trade screenshots to the group. Due to time constraints, I will share more details with you on a daily basis.

BTC surged nearly 40% in November, marking its best monthly performance in nine months. We captured the profits from this main upward wave successfully. The cryptocurrency market continues its strong rebound, and the positive news keeps flowing. Before breaking the \$100,000 mark, BTC is expected to fluctuate within the \$90,000-\$100,000 range. During this phase, the strategy of buying low and selling high, while flexibly navigating within the range, is an efficient way to capture short-term profits. Once BTC successfully breaks through the \$100,000 threshold, the market will enter a historic, one-way bull run. This not only signifies a strong continuation of the trend but will also present unprecedented wealth-building opportunities. Therefore, at this stage, taking advantage of contract trading opportunities within the oscillating range while preparing for a potential breakout will be a key strategy for achieving short-term profits and long-term wealth growth.

That's all for today's sharing, my friends. See you tomorrow.
