Michael Foster

1. The S&P 500 fell back after hitting a record high. Is the risk coming?
2. Continue the strategic partner plan.

Ladies and gentlemen, good morning! I am Michael! Originally, the professor was supposed to give you a wonderful market analysis this morning, but last night he received an invitation from a well-known investment company. This company showed great interest in our Vanguard AI 4.0 system and is exploring the possibility of further cooperation.

As the full launch date draws closer, the Vanguard AI 4.0 system continues to intensify its publicity efforts, and its popularity is also increasing rapidly. More and more outstanding investors have realized the potential of this market trend, and every day the professor's assistant receives cooperation invitations from all over the world. But the professor always adheres to one principle: the interests of business school students come first. In order to ensure that everyone can seize the opportunity at this important node and maximize their profits, many professors choose to decline the invitations.

As we all know, the Vanguard AI 4.0 system is the result of many years of hard work by the professor. He spent countless sleepless nights, relying on his profound market experience and accurate insight into future trends, to polish this subversive system. It is not only an investment tool, but also an innovative investment concept and wealth appreciation model.

As members of the business school, you are the luckiest group of people. Standing on the shoulders of professors and with the power of the Vanguard AI 4.0 system, you have already grasped the key to financial freedom. After the global listing in the future, all regional agents will be the turning point to change their destiny. Let us look forward to it together.

When the opportunity comes, don't hesitate! When you are confident in a transaction, you must act decisively, firmly grasp it and maximize your profits. Today, we finally ushered in the important data market of this week. This is a challenge. A great opportunity to make a profit of more than 200% in a single transaction! Guys, are you ready? Open your account now and welcome this rare profit moment!

Please confirm that you have received the trading signal and strictly follow the operation prompts. Every transaction requires us to go all out, because every penny we invest carries our efforts and expectations. Be responsible for your own funds and every opportunity. Every successful transaction is a solid foundation for our path to wealth freedom.

Since the launch of the Vanguard AI 4.0 Strategic Partner Program, all participating students have achieved significant benefits, which not only makes everyone confident in our Vanguard AI 4.0 system, but also makes more and more students start to pre-order this system. This is not only a high recognition of our team's professional capabilities and system reliability, but also an exciting beginning, indicating the unlimited potential for the successful market launch of

**EVW Business School**

Vanguard AI 4.0 in the future.

With its accurate market prediction and efficient trading strategies, the Vanguard AI 4.0 system continues to help students achieve profitability and provides every user with a clear and powerful path to wealth growth. Your trust and positive feedback have become the biggest driving force for us to keep moving forward. When all participants achieve the goal of a million-dollar profit, I have no doubt that the sales data of the Vanguard AI 4.0 system will see explosive growth when it is officially launched. Looking to the future, as the influence and market recognition of the Vanguard AI 4.0 system continue to increase, I firmly believe that it will become an indispensable tool for every investor, helping more people achieve a leap in wealth!

By then, do you still think it is impossible for EVW to rise to \$24? Do you still think that the success of the EVW token market value management plan is difficult to achieve? At present, the price of EVW is still close to 300% of the growth space from our target price of \$24. This is a rare and huge profit opportunity. Are you ready for this wealth feast?

In fact, even without the cooperation and support of institutions, with the powerful functions of the Vanguard AI 4.0 system and our excellent market layout, it is entirely foreseeable that EVW will break through \$24 or even higher when the system is officially launched. Cooperation with institutions has accelerated the realization of our goals on this basis. Through collaborative efforts with institutions, we can not only help all students participating in the partner program achieve the goal of a million profits faster, but also lay a more solid market foundation for the future promotion of the Vanguard AI 4.0 system.

In last week's sharing, we talked about the topic of wealth shrinkage. I hope to arouse everyone's deep thinking, which will affect our own vital interests. For ordinary people, the impact of wealth depreciation can be described as "devastating".

First, your savings are "silently evaporating." When inflation continues to rise, the money you have saved with great difficulty may not seem to have decreased on paper, but in fact its purchasing power is rapidly declining. Houses, cars, and even daily necessities that you could afford in the past may now be out of reach.

Secondly, the cost of living is snowballing. When the cost of food, energy, medical care, education, etc. rises across the board, but your income cannot keep pace, your quality of life will inevitably decline. The originally planned household spending and savings goals may be forced to adjust or even shelve.

What's more frightening is that the depreciation of wealth has a far-reaching impact on the future. Not only will it make your current life difficult, but it will also hinder your retirement plan. Imagine that when you retire, the pension in your hands can no longer support you to enjoy your old age, and you may even have to go back to work to make a living. What a terrifying prospect!

The most serious problem is that the gap between the rich and the poor will widen further. When

wealth depreciates, the rich can resist depreciation or even expand their wealth by investing in assets, while ordinary people can only watch their wealth shrink due to their lack of asset allocation ability. This unequal wealth effect will lead to class solidification, and the chances of ordinary people turning over a new leaf will become slimmer.

Therefore, the depreciation of wealth is not just a decrease in numbers, but a comprehensive decline in the quality of life and a complete compression of future development. If we take it lightly, we may fall into endless economic pressure, and even cause irreversible impact on the fate of the entire family and individuals.

Therefore, we must firmly grasp the golden opportunity of the current crypto market! The current market generally predicts that the price of Bitcoin (BTC) is expected to reach \$200,000 per coin this year, and the CEO of BlackRock boldly stated that as concerns about currency depreciation intensify, the price of Bitcoin may even soar to \$700,000 per coin. Combined with our analysis, Bitcoin is expected to exceed \$180,000 in the first quarter of 2025. This is not only an important outbreak in the crypto market, but also an excellent opportunity for us to achieve our goal of millions or even tens of millions of profits.

Such a wealth opportunity is rare in a century, and if you miss it, you may never have a chance to turn back. Guys, now is our golden time! Strive to enter a higher level of partner formation. With firm confidence and decisive action, seize this historic opportunity that is destined to change your destiny. Let us work together in the wealth wave of the crypto market and write our glorious chapter!

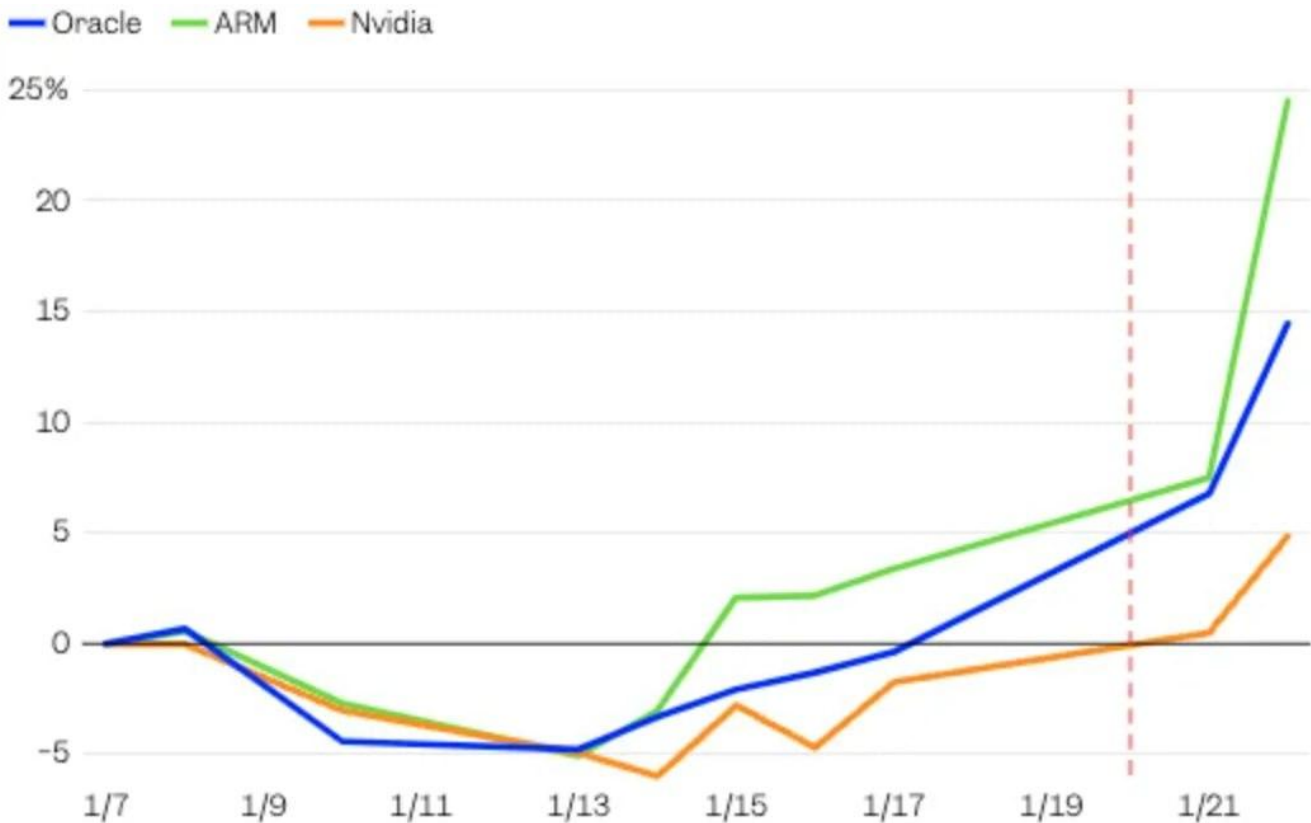

Three days after Trump took office, what changes have taken place in the market?

#### 1. Technology stocks soared: AI infrastructure plan ignited market enthusiasm

The \$500 billion AI infrastructure plan "Stargate" announced by Trump is undoubtedly the core driving force behind the rise of technology stocks this week. The initial project will be led by Oracle, SoftBank, OpenAI and MGX, and companies such as Nvidia, Microsoft and Arm will participate as technical partners to lay the technical foundation for the development of AI in the United States and promise to create 100,000 jobs.

This plan sends a clear signal: technological innovation will be a key area of the Trump administration, and the road to the United States entering the "Golden Age of AI" is being paved. AI leaders such as Nvidia and Microsoft rose by 4.4% and 4.1% respectively, while Arm Holdings rose by 20%. The technology sector became the absolute winner this week.

In the short term, the Stargate plan has injected strong market confidence into AI-related fields; however, after the Stargate news was announced, Musk wrote on the social media platform X: "They actually have no money. I have reliable intelligence that SoftBank's financing guarantee amount is far less than \$10 billion." So the details will depend on the progress of the subsequent plans. In the long run, whether technology research and development and policy promotion can achieve the expected goals will be the focus of investors. The current valuation of technology stocks is already high, and it is necessary to be cautious in chasing the rise. The market needs to see more specific policy details and progress in capital landing.

## 2. Space exploration boom revived: a bull market chasing the stars

Trump's enthusiasm for space exploration has never stopped. From the establishment of the "Space Force" to the repeated promotion of the Mars exploration program, the space industry is becoming an extended field of scientific and technological innovation.

Only three days after taking office, Trump once again set his sights on space and said in his inaugural address, "The United States will continue to chase the stars and plant the Stars and Stripes on Mars." This inspiring speech once again ignited the market's enthusiasm for the space industry, and related concept stocks all rose sharply. The bull market in the field of space exploration has its profound logic, but it is also accompanied by high risks and high uncertainties. Investors need to be wary of price bubbles driven by short-term enthusiasm, and at the same time pay attention to the actual driving force of the commercialization progress of companies such as SpaceX on the industry.

## 3. The electric vehicle sector is cold: the impact of the change in policy direction

After taking office, Trump quickly revoked the electric vehicle incentive policy of the Biden era, including the goal of 50% electric vehicles in the US auto market by 2030. This change has put significant pressure on the electric vehicle sector. Trump also proposed to cancel the so-called "unfair subsidies", which further hit investors' confidence in the electric vehicle industry.

The electric vehicle market is currently facing the risk of policy retreat, and the future trend depends more on the improvement of the core competitiveness of enterprises rather than policy support. As the industry leader, Tesla is still expected to stand out with its technological advantages and market leadership, but small companies may face greater competitive pressure.

#### 4. Bitcoin hits new highs: Policy dividends in the crypto market

Since Trump was elected last year, the price of Bitcoin has been rising, and it hit a new high of \$110,000 after he officially took office. Although the price has since fallen back, the enthusiasm of the crypto market and the confidence of investors have not diminished. Trump's Bitcoin national reserve plan proposed during the campaign and his statement on the relaxation of regulation in the crypto industry have injected strong optimistic expectations into the entire market. This week, the SEC announced the establishment of a special working group to work with the crypto industry to clarify the regulatory framework. This move further enhanced market confidence and pushed the crypto industry into a policy dividend period.

With the policy support of Trump, the "crypto president", the crypto market has undoubtedly ushered in a new era of its own. More importantly, the crypto market is in the four-year bull market cycle of BTC, and both technical and fundamental aspects show a strong upward trend. For all of our partners, this is not only an excellent opportunity to achieve the goal of a million profits, but also a once-in-a-century wave of wealth.

#### 5. Currency market divergence: the seesaw effect of tariffs and the US dollar

Trump's hawkish attitude of threatening to impose a 25% tariff on Canada and Mexico has led to a sharp weakening of the peso and Canadian dollar against the US dollar. In contrast, the US dollar index fell slightly this week, reflecting the market's expectations of a reduction in the threat of general tariffs. As the US dollar weakened, gold prices rose again, hitting a new high since the US election. This shows that risk aversion has not completely subsided, especially in the context of the market's inadequate interpretation of the complex impact of Trump's policies.

The divergence of the currency market reflects the game between policy risks and market sentiment. Investors need to pay attention to the actual implementation of the Trump

administration's tariff policy and the further clarification of future interest rate policies.

Overall, although the stock market has rebounded strongly since last week, it is almost impossible to achieve the goal of a million-dollar profit in the stock market when the technology sector is overvalued and fundamental risks still exist. The most important thing in investment is never whether you are right, but how much money you can make when you are right. Only by joining a strategic partner can you break through. The identity of a strategic partner not only symbolizes a cooperation, but also a rare honor. Why is it rare? Is it just a title? No, it is a symbol of helping the future and creating value. At the current stage, every seat of a strategic partner is particularly precious and the opportunity is fleeting.

#### Unique value of strategic partners

##### 1. Win-win mechanism

Strategic partners enjoy exclusive profit guarantee: if they make losses according to exclusive trading signals, we will bear the full amount. This not only demonstrates our confidence, but also further highlights the scarcity value of strategic partners.

##### 2. Enjoy dividend rights

Senior strategic partners participate in the sales plan of Vanguard AI 4.0 system, enjoy long-term and stable dividend income, and achieve steady growth of passive income. It highlights the uniqueness and scarcity of identity.

##### 3. Exclusive agency authority

Higher-level partners can obtain regional agency qualifications for Vanguard AI 4.0 system. This means that in your area, you will be the exclusive agent and enjoy unique market benefits.

##### 4. Super pension guarantee

Against the background of increasingly prominent social pension issues in the United States, we provide strategic partners with super pension services created by the Future Foundation. This guarantee is limited to the status of partners, which further enhances its scarcity and long-term value.

##### 5. Global and space experience

As an outstanding partner, you will be eligible to participate in luxury cruise travel or space exploration. These unique and distinguished experiences are a profound reflection of the value of life.

The number of places is limited and the opportunity is fleeting!

Guys, strategic partners are not a status that everyone can have. This is a scarce seat, symbolizing future wealth and glory. And now, such opportunities are rapidly approaching saturation!

Because resources are always scarce, and truly valuable things are never in unlimited supply. Strategic partners are an important cornerstone for the future, and both time and quotas are decreasing rapidly. Once the quota is full, this door will be completely closed, and the next opportunity may be out of reach.

If you are still hesitating, now is the most critical moment! If you miss this opportunity, you may never be able to join under such conditions again. Opportunities are for those who are capable of taking action. Every second now determines your future.

Seize the last window of opportunity and become part of this scarce plan! Don't let your future self look back at today with only regrets and emotions. Take action, time will not wait, and opportunities will not leave those who hesitate!

4:00 PM

Professor Reese (Whale)

Topics:

1. Strategic Partner Program is in progress.
2. How much profit have you made from the Token Market Value Management Plan?

Good afternoon, team! I am Milton Reese, your old friend. I am glad to meet you again at this time full of opportunities. This morning, Michael brought us a profound and inspiring sharing. He deeply analyzed the current era of wealth depreciation and reminded us that in the wave of economic change, only by making wealth grow beyond the times can we remain invincible; otherwise, we may be ruthlessly eliminated by the times. In this context, the Strategic Partner Program has become the best strategy to cope with this challenge and has brought significant profit results to many participants.

Our Strategic Partner Program is accelerating. All this is inseparable from the strong boost from the cryptocurrency bull market and the outstanding performance of the Vanguard AI 4.0 system. Through accurate market insights and robust trading strategies, the Vanguard AI 4.0 system maximizes the advantages of contract trading. Every successful transaction not only verifies the system's capabilities, but also paves the way for our steady increase in revenue, helping us achieve our goal of making millions of dollars in profit faster.

**VANGUARD AI 4.0**

Congratulations to all strategic partners. Michael successfully led us to complete a transaction again this morning and successfully stopped the profit. Every operation is so accurate and correct, which once again proves the effectiveness of our strategy and the power of Vanguard AI 4.0 system! The launch of the Strategic Partner Program is one of the most successful strategies of our wealth club so far. Let each partner stand at the forefront of the market and open the door to wealth freedom for everyone. Becoming a strategic partner and joining a higher-level partner group is undoubtedly the best choice at present. Since the launch of the Strategic Partner Program, our income is accumulating at an astonishing rate. This is due to our precise control of the overall investment market, and it also proves that the direction we choose is completely correct. As I said before, the strategic significance of strategic partners is extremely important, and it points us in the right direction.

Although we have led all partners to achieve impressive total asset returns, I need to emphasize again: contract trading is by no means a short sprint, but a marathon that requires patience and wisdom. It requires us to always maintain a clear rhythm and a rational mindset in the ups and

downs of the market. Find the best entry point in every market fluctuation. It is this sense of rhythm and patience that enables us to continue to win in the long-term investment journey and achieve continuous growth and breakthroughs in returns.

More importantly, all of this is inseparable from the powerful power of compound interest. As Einstein said, "Compound interest is the eighth wonder of the world." Therefore, do not interrupt it easily unless it is necessary. Let compound interest become the engine of our wealth growth and bring us endless returns.

Dear friends, the golden age of the crypto market has arrived. Let us seize this once-in-a-lifetime opportunity with firm confidence and steady execution. Let us work together to move towards our own highlight moment and achieve the goal of making millions or even tens of millions of profits!

Last Friday, I led VIP3 and VIP4 partners to buy EVW spot at around \$4. The price quickly rose to around \$5.5 on the same day. On Tuesday, we bought spot again at around \$6, and then the price quickly rose to around \$7.5. These two successful operations not only brought rich returns to VIP3 and VIP4 partners, but also received high recognition from institutions for our execution. After the success of these two tentative operations, we officially fully promoted the Market Value Management Plan from Wednesday, removed the participation restrictions, and all partners can join. So far, the price of EVW has risen to around \$9, and all partners participating in spot trading have gained certain benefits.

Since we fully promoted the Market Value Management Plan on Wednesday, the cost price of the purchase on that day was about 7 US dollars. The current rate of return of this transaction has reached 28%. For partners who participated in this plan earlier, VIP3 and VIP4, the rate of return of spot transactions is even higher. The cost price of the first purchase was around 4 US dollars, and the current rate of return has reached 125%! This is the profit in just a week or so. Such a profit is undoubtedly very considerable. Assuming that the funds purchased at that time were 1 million, now the funds have increased in value to 2.25 million, and the net profit has reached 1.25 million! Through a simple comparison, we can clearly see that since the overall trend of EVW prices is rising, the earlier you buy, the lower the cost and the higher the rate of return!

However, what I want to tell you is that all this is just the beginning, and this is just a new starting point on our road to profitability. Don't forget that in our entire Market Value Management Plan, the target price of EVW is above \$24. The current price still has nearly 300% room to rise from the target! Therefore, it is still a good time to buy. If you have prepared the funds, please find an assistant to make an appointment as soon as possible. The assistant will arrange the best time and price to buy for you. Take action, friends, don't wait until the price goes up before you regret it. I have always emphasized that in order to achieve our million-dollar profit goal faster and more steadily, we must firmly grasp every opportunity to make a profit.

Of course, whether you are a student who has already bought or is about to buy EVW spot, I would like to reiterate that the key to the success or failure of our Market Value Management

Plan is confidentiality and execution. It is precisely because we have shown good execution in the previous trial operation that the institution is willing to further cooperate with us more widely to expand our number of participants.

I require that no one should disclose the transaction-related information in our group to people outside the group. Because once our plan is leaked, the funds outside the plan will interfere with our trading plan, resulting in the price not being able to rise smoothly, and ultimately leading to the failure of the plan, and the final loss is everyone of us.

In terms of execution, I have repeatedly emphasized that before the EVW price is pushed up to the target price, each of us must strictly follow the trading signals when buying and selling. Before the plan is completed, if someone only cares about his own interests and sells a large amount privately, it will inevitably cause the price to fall back and even make the entire plan fail. The reason why we hold firmly after buying is to lock in the chips in our hands and reduce the circulation, which will be conducive to the subsequent price increase. If someone only cares about personal interests and has no team awareness, if there is such a participant, I will directly disqualify him from participating.

Of course, in yesterday's sharing, I have explained to you why the increase in EVW in the past two days is not as large as in the previous days. On the one hand, we don't need to push up the price too quickly, because this may attract the attention of other institutions and cause unplanned funds to follow suit, so we just need to move forward steadily according to our plan. On the other hand, due to bank factors, some students are still preparing funds, and it takes some time to prepare funds. So in the process of communicating with the institutions, I suggest that the institutions should not push up the price of EVW too quickly. In this way, some students whose funds have not yet arrived can be properly taken care of. Since I promised not to give up any student before the implementation of the plan, I will definitely fulfill my promise.

Our Market Value Management Plan is not implemented in one step, but in stages. Through multiple operations this week, we have completed the first stage of operations. We currently hold a certain amount of EVW spot and have completed the position building. At the same time, according to our statistics, there are still a lot of funds outside the plan that have participated in the purchase of EVW. So, next, when we do it, on the one hand, we must firmly hold the EVW spot in our hands and not let other funds take it away easily. On the other hand, the institutions that cooperate with us will take necessary measures, such as letting the price fluctuate violently to drive out these funds outside the plan. If these funds outside the plan are not driven out in time, they will cause us trouble in the process of EVW price increase in the later stage.

Therefore, in the following market fluctuations, no matter how the EVW price fluctuates in the short term, please stay calm, follow the plan, and do not act on your own. Only when every student can strictly follow the plan, the Market Value Management Plan can be smoothly promoted and ultimately achieve the goal. Please always remember that our first goal is to push the EVW price above \$24. After waiting for the price to rise to the target price, we will not sell all of them immediately, because this will cause a sudden price drop. Those who sold first may have made a profit, while those who sold later will see their profits shrunk significantly due to the

sudden price drop. This is unfair to the students who sold later. So I will not allow this to happen. Therefore, I will notify everyone to sell in batches and in an orderly manner, so that the price will remain stable and everyone's overall interests can be guaranteed. Do you understand?

Next, let us interpret the core advantages of the "Strategic Partner Program" in detail:

### 1. Guaranteed returns, no risk

When we launched the Strategic Partner Program, we solemnly promised:

"If your total asset return target is not achieved within the term of the Strategic Partner Program, we will make up your unrealized target profit within one week after the expiration of the Strategic Partner Program." This means that your returns are guaranteed! We always uphold the spirit of the American contract and do our best to help you achieve steady growth in wealth.

At the same time, your responsibilities were clearly defined at the time:

"When the planned returns are achieved, you need to pay part of the net profit to pre-order our Vanguard AI 4.0 system."

This is a win-win cooperation method that not only guarantees your returns, but also allows you to take the lead in future wealth opportunities. This is also the core vision of our business school-to achieve great win-win results with students!

### 2. The best wealth channel in the economic environment

In the current situation where the stock market is not very profitable, the Strategic Partner Program is the most reliable and efficient wealth growth channel. It not only allows you to move forward steadily in the turbulent market, but also allows your assets to grow beyond the market through a clear profit mechanism.

### 3. The higher the level, the greater the rights and interests, and the higher the income.

A significant advantage of the Strategic Partner Program is that the higher the level, the lower the proportion of profits you need to donate, and the greater the rights you enjoy! The following are the specific characteristics and benefits of each level:

#### VIP1 and VIP2:

You need to donate 12%-15% of your profits to the EVW Business School Fund, and the total asset profit target is 200%-600%. This means that the more you earn, the more you donate to the Business School Fund. Although the donation ratio is relatively high, it lays the foundation for you to accumulate higher-level qualifications.

#### VIP3:

The donation ratio has been greatly reduced, and only 7% of the profit needs to be donated. The total asset profit target is 400%-800%. At the same time, VIP3 partners will also begin to enjoy the profit dividends from the sales of the Vanguard AI 4.0 system for a period of 3 years. At this time, your income advantages and rights have been comprehensively improved, and you have reached a new height of wealth growth!

VIP4:

The donation ratio continues to drop significantly, only 5% of the profit needs to be donated. In addition, you will obtain the initial qualification of the regional agent of the AI  $\Omega$  system, opening a new chapter of wealth. This not only means a significant increase in income, but also means that you officially own a "technology company" of your own. As we all know, AI is the core driving force of the future world. It can not only replace a large number of traditional labor forces, but also create countless new opportunities. In the future, the Vanguard AI 4.0 system will be differentiated into multiple versions, widely used in different life scenarios, bringing subversive social changes, and providing you with long-term inheritance and huge social influence beyond wealth.

The grading system of the Strategic Partner Program is based on fairness and efficiency, and tailors a diverse income and equity distribution mechanism for participants at different levels. As your level increases, you will not only enjoy a lower profit donation ratio, but also gain more diverse and long-term income opportunities. This mechanism is very simple and clear: the more you invest, the more you earn.

Only when you earn more can more people afford the personal version (priced at US\$50,000/year) and institutional version (priced at US\$1 million/year) of the Vanguard AI 4.0 system.

The Strategic Partner Program is not only a tool for wealth growth, it is essentially helping you start a business and help you build a high-potential, high-tech enterprise! This is not just a simple investment, but it takes you into a high-tech industry that ordinary people can hardly touch in their lifetime. This means that you are not only making money, but also building a business landscape that can lead the future.

Do you understand? This is a door to a higher level of life!

The Strategic Partner Program is not only an important tool to help you achieve wealth growth, but also a win-win strategy.

The core of this program not only provides a strong sales guarantee for the listing of the Vanguard AI 4.0 system, but also builds a springboard for each partner to move towards wealth freedom. If you make a million dollars with our help, is it easy to pay 50,000 US dollars to subscribe to the personal version of the Vanguard AI 4.0 system? If you make 10 million, 50 million, or even hundreds of millions of US dollars, and spend 1 million US dollars to subscribe to the institutional version of the Vanguard AI 4.0 system, I believe you must be very willing to pay for it, right?

Through the Strategic Partner Program, we not only help partners achieve exponential growth in wealth, but also lay a solid foundation for the market promotion of the system. This is an opportunity for both parties to gain the most benefits from the cooperation, and your success will also be the best proof of the excellent performance of the Vanguard AI 4.0 system!

Today's sharing has come to an end for the time being. Friends, please get ready and let us look forward to tomorrow's profit opportunities together. See you tomorrow!

**EVW Business School**
