Professor Reese (Whale)

Topics:

1. Has DeepSeek become the "black swan" of the U.S. stock market? Has the major correction officially begun?
2. Get ready to sprint towards the million-dollar profit goal this week.

Good morning, team! I'm Milton Reese, your old friend. A new week has begun, bringing key opportunities for us all! This week not only ushered in the first Fed interest rate decision in 2025, but also a series of intensive and heavy economic data will be released starting from Tuesday. These data will deeply influence market trends. The Fed interest rate decision on Wednesday, in particular, may offer greater profit potential than the super non-farm payroll data earlier this month!

Recalling the super non-farm payroll data at the beginning of the month, the single return rate of senior partners once reached an astonishing 600% or more. The brilliant performance of that transaction not only gave us more confidence, but also verified the power of precise strategy and decisive execution. This week, we will go all out to try to replicate this crazy profit effect again!

All partners are requested to prepare immediately to meet the upcoming market fluctuations! Although there is no important data released today, we will continue to keep a close eye on the market and provide you with accurate trading signals at any time to help you seize every short-term opportunity and accumulate more wealth in advance for this week's goals.

Friends who have not prepared funds yet, please take action immediately and prepare the funds! This is the last week of this month, and we will lead all partners to sprint to the million-dollar profit plan for our goal! If we want to achieve returns beyond expectations, then this week is the golden trading time node that you absolutely cannot miss!

This weekend, a piece of news from China shook the global technology and capital markets. Artificial intelligence company DeepSeek launched its latest large model R1, which caused a sensation worldwide. According to third-party benchmarks, DeepSeek R1 surpassed leading American artificial intelligence companies such as OpenAI, Meta, and Anthropic in multiple indicators. For example, in the AIME 2024 math benchmark test, R1 achieved a success rate of 79.8%, surpassing OpenAI's O1 reasoning model; in the Codeforces standardized coding test, it received a 2029 Elo rating, surpassing 96.3% of human competitors.

However, what is really remarkable about DeepSeek R1 is its extremely low cost. The query cost per million tokens is only \$0.14, while OpenAI's cost is as high as \$7.50, which is 98% lower. More importantly, the R1 model allows open source, a strategy that has a huge impact on the global AI industry chain, especially technology stocks with high computing power requirements.

EVW Business School

Impacted by DeepSeek's ultra-low-cost AI model, AI and chip-related technology stocks led the decline, and the market began to worry that such stocks were overvalued. This incident may even become the fuse for a sharp correction in the technology sector.

Therefore, although the US stock market performed strongly in Trump's first week in office last week, with the S&P 500 and the Dow Jones Industrial Average both rising by more than 2.8%, and the Nasdaq Composite Index leading the three major indexes with a 3.1% increase, this short-lived rebound may be coming to an end. Especially with the dense economic data to be released this week, the uncertainty in the market is becoming more and more significant, and panic is heating up, indicating that the US stock market may usher in a larger adjustment.

In the next few days, the market will focus on two key events. First, the financial reports to be released by technology giants such as Meta, Microsoft, Apple and Tesla will become the focus of market attention. The performance of these companies will not only directly affect investor sentiment, but also verify whether the wave of artificial intelligence can continue to provide strong support for the technology sector. Secondly, the Federal Reserve is about to announce its latest monetary policy decision. Market expectations suggest a nearly 100% probability that the Fed will keep rates unchanged, but the current market structure and technical signals indicate that correction risks are building.

As repeatedly emphasized last week, although Trump's policies have brought short-term benefits to the market, from a technical point of view, there are obvious hidden dangers in the rebound of US stocks: trading volume shrinks when rising, but increases when correcting. This divergence between volume and price clearly shows that institutional funds have not flowed in significantly, but have continued to flow out. Combined with Goldman Sachs' latest report, US stocks may face at least 30% of the risk of a correction in the future. This series of signs once again verifies the correctness and foresight of our decisive withdrawal from the stock market at the market peak and our full transition to the crypto market.

Compared with the uncertainty of US stocks, the profit effect of the crypto market has become more prominent. Since joining the strategic partner program, our total asset return rate has continued to grow at an astonishing rate. This not only verifies that our investment strategy is effective and efficient, but also clearly shows that the crypto market is ushering in an unprecedented golden opportunity. While the traditional stock market is gradually entering the early stage of a bear market, the crypto market is developing rapidly driven by the bull market cycle, bringing us a historic opportunity to change the wealth pattern.

Overall, the two-year bull market in the U.S. stock market is coming to an end. From the hidden dangers of a short-term rebound to the rise of new forces in the field of artificial intelligence, which has caused a sharp shock in the technology sector, the pressure and risks currently facing the U.S. stock market are accumulating. We must clearly realize that we are now in the early stages of a bear market. The best time to re-enter the stock market will come when the bear market ends and risks are fully released.

Therefore, at this stage, our investment strategy needs to be clearer: focus on the crypto market and seize this more favorable and higher potential investment track. The crypto market is in the midst of a bull market, and huge wealth opportunities are brewing. This is the best choice to achieve excess returns at the moment!

Our Strategic Partner Program is centered around the crypto market, which is a field full of opportunities. So far, our performance has been very significant, which fully proves that we have chosen the right market. I am confident that we will achieve the expected profit target by the end of the Strategic Partner Program!

With the continuous advancement of the Strategic Partner Program, the total asset return rate of all partners is accelerating under the effect of compound interest. This remarkable achievement not only enhances everyone's confidence in our Vanguard AI 4.0 system, but also attracts more and more friends to pre-order this highly anticipated trading system. This is undoubtedly an exciting and good start! When all our partners successfully achieve their ideal profit goals, the

official launch of the Vanguard AI 4.0 system will surely usher in explosive market demand, and sales data will surely shine! This is the best way for us to achieve a win-win situation with our partners! Friends, this is the result of our joint efforts and progress together, and it is also our solid step towards a brighter future!

Regarding the Strategic Partner Program, I must make it clear to everyone: Please all friends understand that the Strategic Partner Program is not just a simple trading signal tool! The launch of this program carries the development plan of our Fortune Club for the next five to ten years. We regard it as a business and go all out.

The real value of the Strategic Partner Program: When we select excellent regional agents, you essentially own a technology company of your own! You don't need to invest a lot of money. We have a mature technical and operational team to protect you. We will plan the location and operation plan of offline stores in detail, saving you the tedious affairs. All you need to do is start with small goals, such as:

- a. Achieve the established profit goals.
- b. Order the Vanguard AI 4.0 system in advance.
- c. Or become a higher-level partner!

We can see the potential of the regional agency model from the experience of many successful companies:

1. McDonald's:

McDonald's is a model of the franchise model. By allowing individuals or companies to purchase regional agency rights and operate independent restaurants, McDonald's has achieved rapid global expansion and become a world-renowned company.

2. Starbucks:

Although most of Starbucks stores are directly operated by the company, in the international market, Starbucks adopts the regional agency model and jointly develops the market with local partners to achieve global brand success.

The core goal of our Strategic Partner Program is to successfully launch the Vanguard AI 4.0 system and achieve the established initial sales target. Through the great win-win concept of global regional agents, this epoch-making product will quickly become popular around the world in a very short period of time. We plan to establish Vanguard AI 4.0 global experience centers in key locations, allowing users to try it before placing their orders.

Therefore, the Strategic Partner Program is not only to help you get trading signals and make money easily, but also a key step to create a win-win situation for us! It will help you achieve continuous accumulation of wealth.

This week will be a critical week for us to sprint to the million-dollar profit. This is the last week of

January and the best opportunity for us to achieve the million-dollar profit goal. Therefore, in order to fully seize this rare opportunity, I hope that all partners can keep up with the pace, make fund arrangements in advance, plan time reasonably, and complete each subsequent operation with 100% execution.

Next, we will have at least three more important investment opportunities. These opportunities are not only golden opportunities given by the market, but also the strongest help for us to achieve our million-dollar profit goal. Opportunities are fleeting, and only action can grasp them! Are you ready for this wealth sprint? Go all out and make this week a legendary week for all of us!

First, we will continue to promote the Strategic Partner Profit Plan and make every effort to seize the super data market on Wednesday - the first Federal Reserve interest rate decision in 2025. The market driving force of this major economic event far exceeds non-farm data and CPI, and is expected to bring us a single return of more than 600%. Looking back on this month, whether it is the big non-farm data at the beginning of the month or the previous super CPI data, we have successfully captured profit opportunities and achieved excess returns. The interest rate decision provides greater potential and is definitely a key node for rapidly increasing the return on total assets!

I hope all partners will prepare funds in advance and join higher-level groups to maximize profits. In this market volatility, the U.S. stock market may face a major impact, but the crypto market has ushered in a great opportunity! Seize the moment, every precise action will help you move towards your million-dollar profit goal. Don't miss this historic opportunity, let us hit new highs together!

Secondly, we will fully accelerate the EVW Token Market Value Management Plan 2.0 this week. Last week, the slowdown in EVW's growth was a steady strategy we adopted after consultation with the institution. The purpose was to avoid pushing up the price too quickly, ensure the smooth implementation of the plan, and reserve opportunities for more students to participate. Because I promised not to give up any student, now is the critical moment to seize the opportunity! Our primary goal is to push the price of EVW to \$24, and there is still more than 200% room for growth. The sooner you participate, the higher the return! Please prepare funds in advance and contact the assistant to get the best time and price to buy. In the process, please strictly abide by the plan and do not act privately to ensure the smooth progress of the plan and the overall interests. In the future, when the price reaches the target, we will sell in batches in an orderly manner to avoid large market fluctuations and ensure that each partner's income is maximized. This is not only an opportunity to achieve a million-dollar profit, but also a historic opportunity to change your destiny.

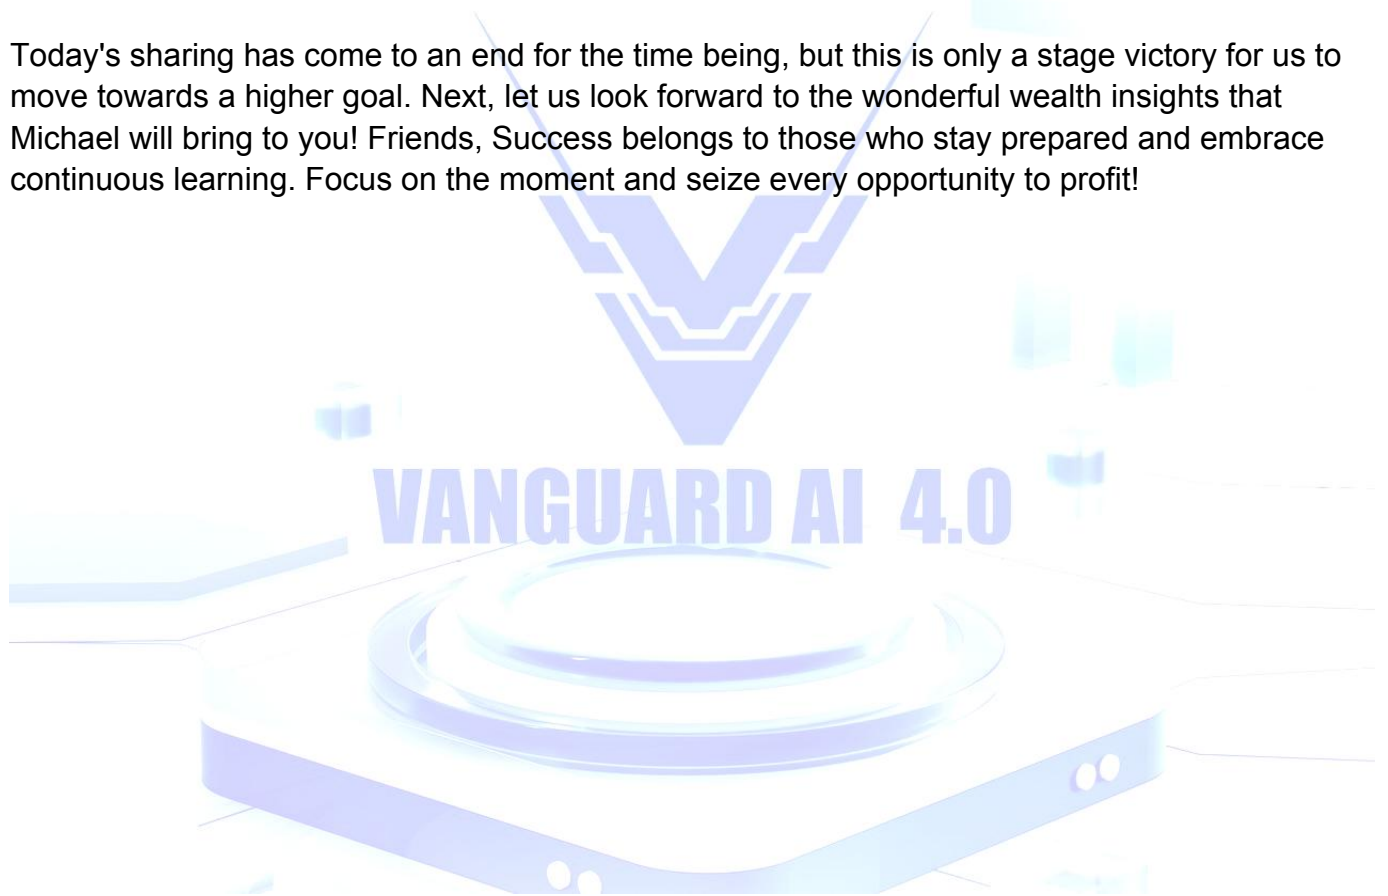

Finally, high-quality ICO projects will soon be launched on the BFXCOIN trading center, providing investors with an excellent opportunity for risk-free and high returns. ICO is similar to IPO in the stock market. Investors can purchase tokens at a low price in the early stage and realize significant appreciation after listing. Compared with traditional investment, ICO projects have a short cycle and fast returns, almost guaranteeing 100% profit. As the "golden opportunity"

in the crypto market, ICO has become a favorite investment choice for whales. A vivid example is Trump's meme coin of the same name, TRUMP, which soared from \$0.1824 to \$75 in two days, an increase of 40,000%. If you invested \$10,000 at that time, you could achieve a return of \$4 million in just two days. This case perfectly illustrates the potential and charm of ICO! Dear friends, the opportunity for ICO projects is coming soon, and we will provide you with all-round support to help you seize this once-in-a-lifetime wealth opportunity.

Dear friends, the transaction just completed has successfully stopped profit again! This achievement is not only the best proof of our team's precise strategy, but also a high recognition of the partners' firm execution and trust! In the wave of market fluctuations, we can move forward steadily and achieve great results, which is inseparable from the full cooperation of every partner, and the precise support and scientific decision-making provided by the Vanguard AI 4.0 system.

Today's sharing has come to an end for the time being, but this is only a stage victory for us to move towards a higher goal. Next, let us look forward to the wonderful wealth insights that Michael will bring to you! Friends, Success belongs to those who stay prepared and embrace continuous learning. Focus on the moment and seize every opportunity to profit!

Jan. 27, 2025, EST

4:00 PM

Michael Foster

1. Nasdaq and S&P 500 plunged, is the big correction of technology stocks coming?
2. We will usher in the super data market on Wednesday, are you ready?

Ladies and gentlemen, good afternoon! I am Michael! It is a pleasure to meet you again. A new week has arrived, and this week is of extraordinary importance! The market is opening a new window of opportunity for us. This week's market and profit space are very promising. Judging from the current market expectations, this week's performance may even surpass the brilliant record of the previous super data week.

This is a critical moment for us to welcome substantial profits, and it is also a golden opportunity for every partner to achieve wealth leap! Are you ready? Let us go all out to welcome our highlight moment!

This week is the last week of January, and it is also a critical moment for us to sprint to our million-dollar profit goal. We are about to usher in three major golden opportunities, each of which may become a key node for you to achieve your million-dollar profit goal.

First, Wednesday's super data market will be one of the most important profit opportunities this month. The importance of this market is far greater than the previous non-farm and CPI data, and the market volatility is expected to reach a new high. According to historical data and experience, we have the opportunity to achieve a single profit of more than 600% in this market. There are only two days left before this opportunity, so please be sure to prepare funds and time in advance and go all out!

Secondly, the Token Market Value Management Plan is progressing steadily, and partners who participated in the purchase last week have already made considerable profits. Next, we will cooperate with institutions to quickly raise prices and push the plan into a new stage. At present, the market still provides a window for everyone to participate. Please seize the opportunity. Such explosive profit opportunities are fleeting and will be difficult to encounter again if you miss them.

Finally, the professor announced a major positive news: high-quality ICO projects will soon be listed on the BFXCOIN trading center. Looking back at the amazing performance of Trump's TRUMP coin, which soared 400 times in two days, this kind of opportunity has come again, providing us with an excellent opportunity to achieve our goal of making millions or even tens of millions of profits.

Guys, the wave of wealth is coming, the key is whether you can seize it decisively. Now is the best time to act, please be prepared, follow the plan, and go all out to convert every opportunity into actual benefits, and work hard to write a glorious chapter for us!

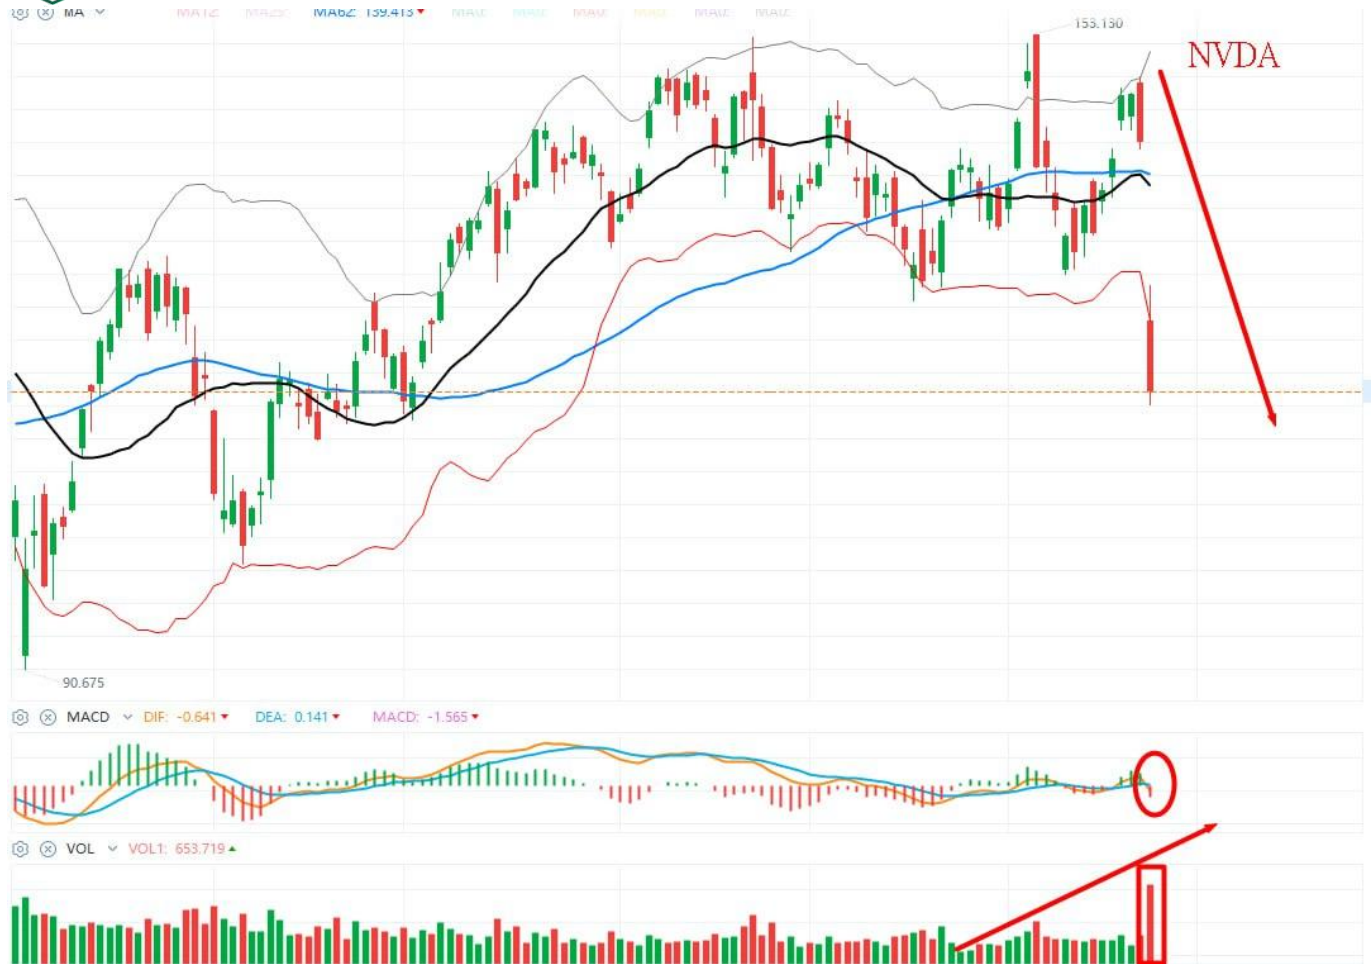

Last week, the Chinese AI team DeepSeek dominated the U.S. hot search list with its breakthrough large model DeepSeek R1. Its application topped the free app download rankings in Apple China and the United States, and even surpassed ChatGPT in the United States. This milestone event marks the powerful rise of China's AI technology. The DeepSeek team successfully trained an open source AI large model with performance comparable to the OpenAI model at a cost of less than \$6 million and 2048 ordinary H800 chips, while the training costs of Anthropic and OpenAI were as high as \$1 billion. The query cost of DeepSeek R1 per million tokens is only \$0.14, which is a 98% reduction compared to OpenAI's \$7.50. This indicates that AI computing power has entered a new paradigm of "extreme compression and efficient training" from "high computing power cost", and also announces the arrival of the AI ASIC era.

VANGUARD AI 4.0

This AI breakthrough has brought a huge shocking effect to the market. Today, the three major U.S. stock indexes collectively opened lower, especially the S&P 500 and Nasdaq indexes, which fell significantly, and Nvidia fell below the market value of 3 trillion U.S. dollars, with a daily decline of more than 17%. This is just the beginning of the adjustment. Judging from the recent market performance, we reminded everyone to sell stocks and switch to the crypto market as early as when the S&P 500 and Nasdaq rebounded to new highs, because this round of stock market rebound lacked volume support and was mainly driven by retail investors, while institutional funds not only did not enter the market, but continued to withdraw. Against the backdrop of the upcoming Federal Reserve interest rate decision and the financial reports of large technology stocks, the uncertainty of the U.S. stock market has increased sharply, and the subsequent correction may further expand, and some stocks may even fall by more than 30%.

In contrast, the crypto market's recent amazing earnings performance highlights its huge appeal. As we have repeatedly emphasized, even if the U.S. stock market rebounds in the short term, its profit margin is simply "insignificant" compared to the rich returns in the crypto market. Especially at present, the market is volatile and the stock market risks are increasing. We have successfully liquidated all stocks before the stock market fell, and decisively joined the strategic partner program to transfer assets to the fastest-growing crypto market track.

For those investors who are still obsessed with trading U.S. stocks, I can only say: "Sometimes, people can't teach you many times, but the market only needs to teach you once, and you will learn it." If you still hold on to losing stocks, then I can only wish you good luck, but the road to success has nothing to do with it. We will no longer provide any trading strategies for the current U.S. stocks, because the U.S. stocks have lost their investment value at this time, and there are still lower lows waiting in the future, and we want to seize the golden opportunity of the crypto market.

Guys, this is a time to test your execution! Those who have switched to the crypto market early and joined the strategic partner program are now steadily growing their assets and continuing to receive generous returns. The current pullback is not only a manifestation of stock market risks, but also a reaffirmation of the correctness of our strategy. Future profit opportunities are waiting for you in the crypto market. Let us decisively give up unnecessary risks, join a higher-level partner group, and embrace the wealth wave of the crypto market together!

01/24/2025	1720%	184.15%	2185.00%	285.17%	2415.00%	354.57%	3650.00%	880.00%
01/27/2025	1790%	194.09%	2285.00%	304.42%	2515.00%	377.30%	3780.00%	943.70%

Perhaps, some friends have not really understood the power of stable compound interest. Let's take the data of this strategic partner program as an example: At present, the total asset return rates of VIP1, VIP2, VIP3, and VIP4 partners have reached 194.09%, 304.42%, 377.30%, and 943.70%, respectively. This is just a conservative statistic. Even so, these return rates have far exceeded the average return rate of the stock market. Moreover, most importantly, these returns are not accidental, but extremely stable returns achieved through scientific strategies and execution. Under such a compound interest growth model, achieving our goal of a million profits is not an unattainable dream, but an inevitable result.

Investing is not gambling, it is a long-distance race that requires correct persistence and strategic patience. The other half of confidence is patience. Real investors understand

that the market is a long-term game stage, and those who persist at the critical moment will eventually have the last laugh. When you succeed in the future, looking back on your persistence today, you will be grateful that you never gave up. It is this persistence and patience that helps us find a steady path to profit in the ups and downs of the market and move steadily towards our wealth goals.

The power of compound interest is great. As Einstein said: "Compound interest is the eighth wonder of the world. He who understands it, earns it; he who doesn't, pays it." The miracle of compound interest comes from our respect for time and our grasp of opportunities. As long as you plant the seeds of wealth in the right way, it will blossom and bear fruit over time, bringing you returns you never imagined. According to the current growth trend, we have full confidence that we can lead more than 80% of our partners to achieve the goal of a million-dollar profit before the end of February.

If your current return on total assets has not yet reached the average level of partners, don't be discouraged. The market is always full of opportunities. The key is whether we can seize them. This week is crucial for us, especially the three major profit opportunities that are coming up. The most eye-catching one is the super data market on Wednesday. This important event, comparable to the non-farm and CPI data market, may bring us a single profit potential of more than 600%.

The high volatility of the crypto market provides unlimited possibilities for every participant. The key to success lies not only in market trends, but also in our attitude and action towards opportunities. Although everyone has the same starting point and opportunities, the final results are often very different due to differences in execution. Those who can decisively seize opportunities and go all out are often the ultimate winners in the market.

Wednesday's super data market will be an important springboard for you to achieve your goal of making millions of dollars in profits. Please prepare your funds in advance and greet every trading signal with 100% execution. Opportunities never wait for those who hesitate. Only those who act quickly and go all out can grasp this rare feast of wealth. Let us work together to sprint to our goals and seize this golden opportunity to change our destiny!

After we have achieved the million-dollar profit target for most partners, the next stage of our focus will be on the launch of the Vanguard AI 4.0 system. This is not only an important milestone in the development of our team, but also a key step in promoting the innovation of global smart investment. At present, more and more partners have pre-ordered the Vanguard AI 4.0 system, which fully reflects everyone's high recognition of the system's strength and future potential, and also lays a solid foundation for the successful launch of the system.

Achieving the goal of a million-dollar profit is not only a staged victory, but also an important starting point for moving towards higher achievements. With its precise market insight and strong quantitative trading capabilities, the Vanguard AI 4.0 system will become a powerful weapon for all partners to further expand their profits and seize market opportunities. More importantly, members who join higher-level partner groups will also have an exclusive opportunity to become regional agents of the Vanguard AI 4.0 system. Imagine that when you are not only a user, but also can bring value to more investors by promoting the system, while obtaining additional profit returns, this is a rare opportunity!

Looking ahead, our goal is not only to make the Vanguard AI 4.0 system shine in the market, but also to help more investors achieve wealth transformation through it. The efforts of each partner are key to laying the foundation for the successful promotion of the system and future market layout.

Guys, the opportunity is right in front of you. Now is the best time to join a higher-level partner group, and it is also the golden window to grab the Vanguard AI 4.0 system regional agent seat. Through this opportunity, you can not only get higher returns, but also bring value to more investors by promoting the system, and become a leader in intelligent investment innovation.

Let us work together and go all out to not only achieve the current profit goals, but also create unlimited possibilities for the future! The successful promotion of the Vanguard AI 4.0 system will be an important milestone for us to move towards greater glory.

That's all for today's sharing. Please be prepared! Wednesday's super data market is coming, which is a great opportunity for us to achieve breakthrough returns. Take action and embrace this wave of wealth with all your strength!
